1 Introduction

There are a number of changes that have been made to the course player for eLearning to provide learners with more information on their courses and enhance the overall experience.

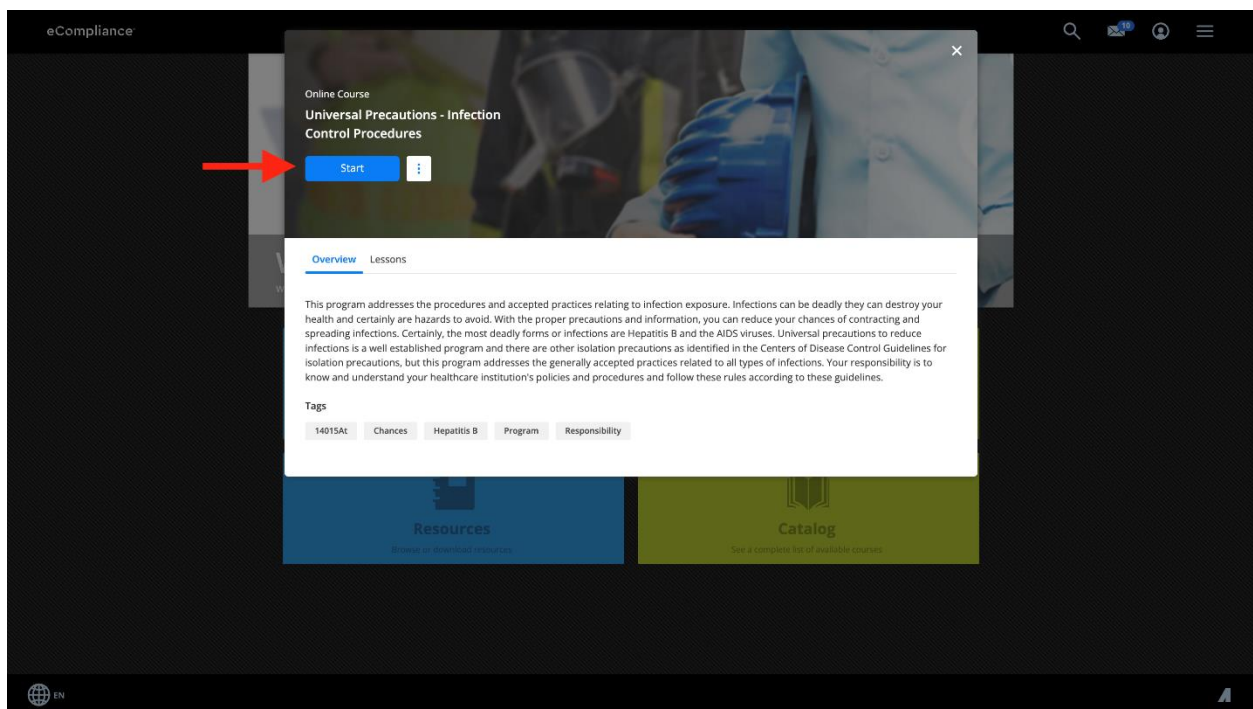

With these changes there is a modified process for starting new courses and retaking courses. Please view the details below on these changes along with some additional information on some of the new buttons available.

These changes apply to the web and mobile app.

2 How to start a brand new eLearning course

To start a brand new course simply click on the "Start" button.

Once selected you will automatically be enrolled into this course and you can begin learning.

3 How to retake an eLearning course

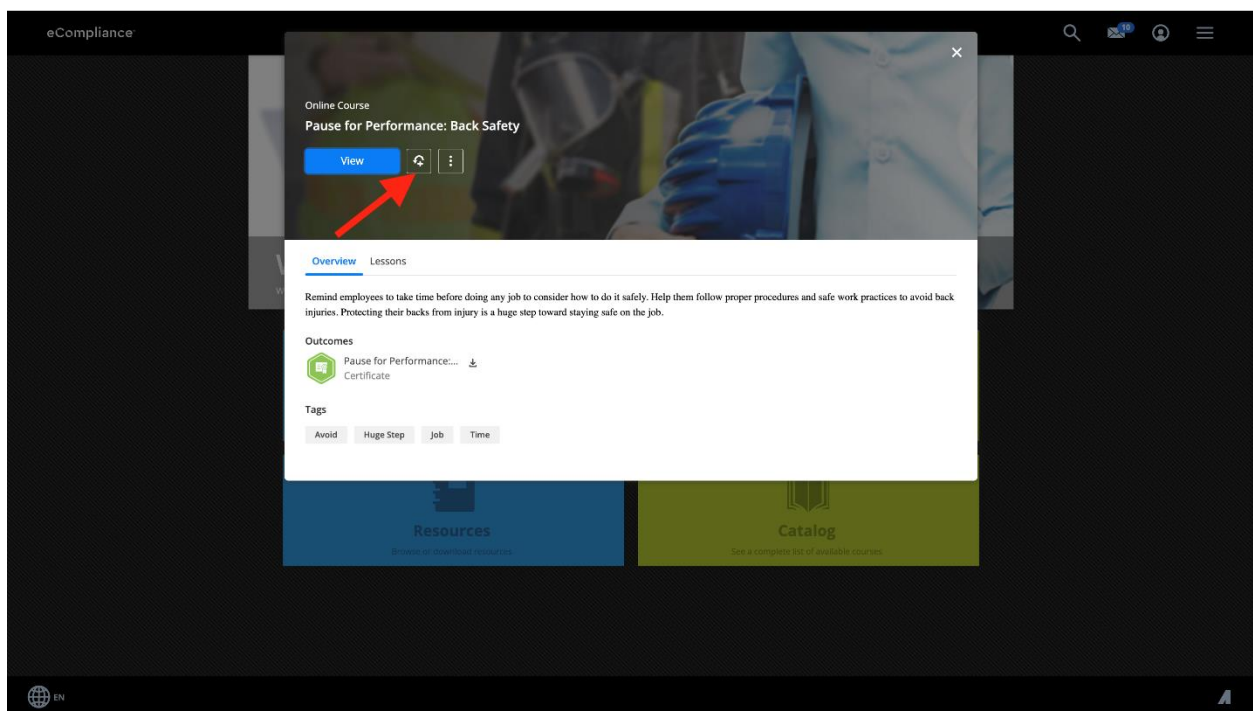

eLearning courses are retaken when the course certificate has expired or approaching expiration.

When you come to the course you will see the previous certificate that you obtained, This is the certificate from the last time you competed the course.

The first step is to re-enroll so that you can start the course from the beginning. If you simply click press "Start" without re-enrolling then you will not receive your new certificate upon completion, and the course will remain in the "Training" list "My Stuff" on web and mobile.

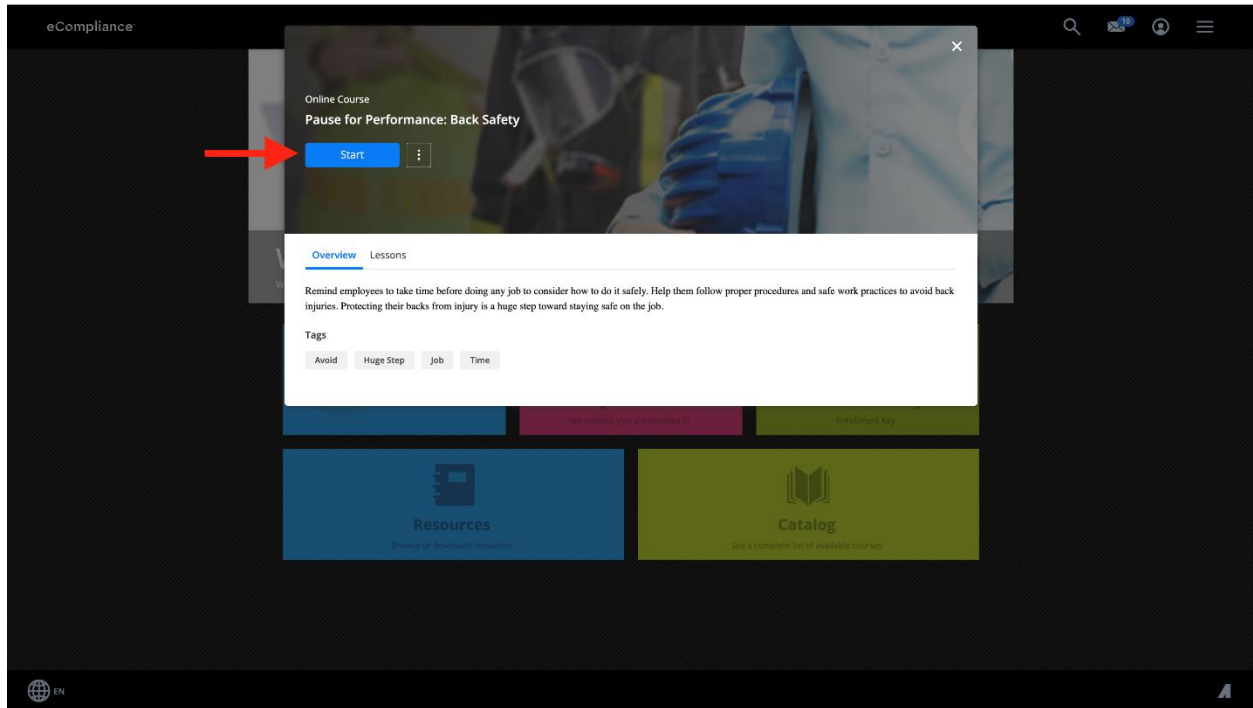

You must follow these 2 simple steps to re-enroll in the course and receive your certificate in eCompliance upon completion:

1. To start on a course click on the arrow icon to the right of the View button

Once you re-enroll you will see a note at the bottom of the screen in green that you have successfully enrolled.

2. Click on "Start"

4 How to view the course in full screen mode

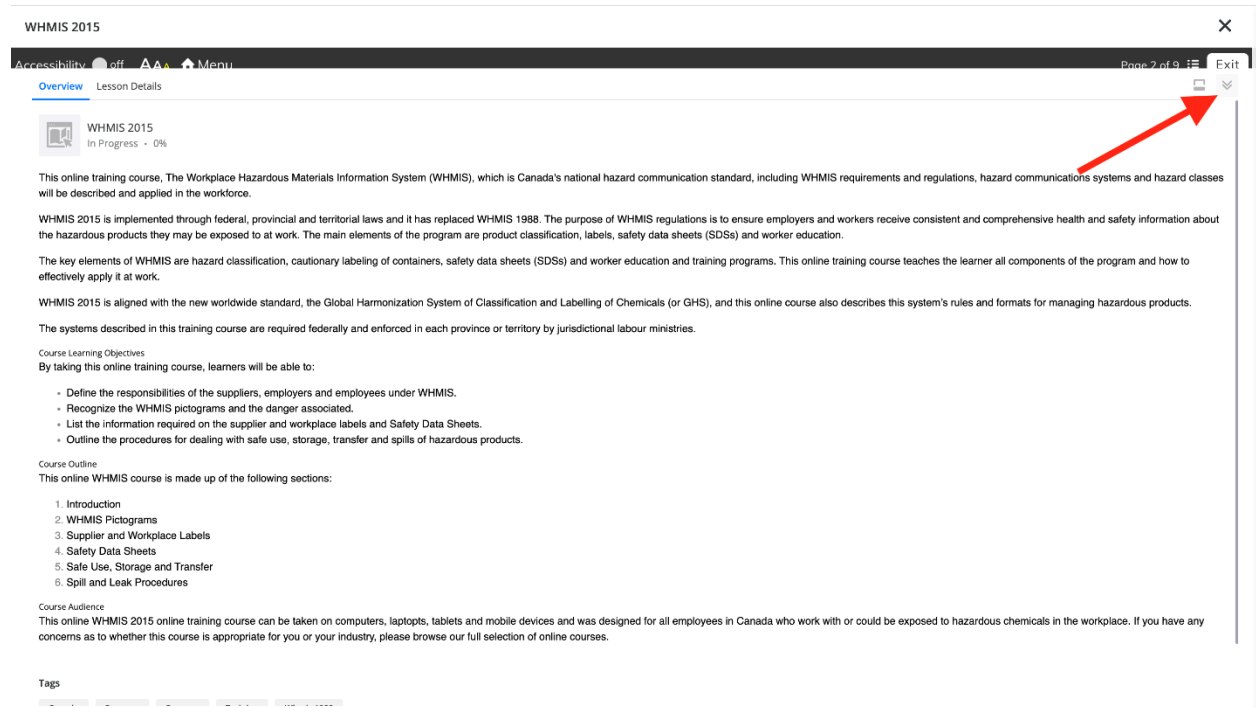

To play the course in full screen, remove the text at the bottom of the page, click on the screen icon on the right-hand side at the bottom of the page.

The screenshot displays the WHMIS 2015 course interface. At the top, there is a navigation bar with 'WHMIS 2015' on the left, 'Accessibility off' and 'Menu' in the center, and 'Page 2 of 9' and 'Exit' on the right. The main content area features a large image of a person in a yellow hazmat suit and blue gloves. Overlaid on the left is a white 'Welcome!' box with a play button icon and text: 'In this course, we will describe the Workplace Hazardous Materials Information System - WHMIS - and how to effectively apply it at your work. WHMIS 2015 is aligned with the new worldwide standard, the Globally Harmonized System of Classification and Labelling of Chemicals (or GHS). We will describe this system's rules and formats for managing hazardous products. The systems described in this training are required federally, and enforced in each province or territory by jurisdictional government departments or agencies responsible for occupational health and safety.' On the right, a white 'Exit Course' box contains the text: 'When you're ready to leave the course, please click or tap this Exit button.' and a 'CLOSE' button. At the bottom left, there are tabs for 'Overview' and 'Lesson Details'. Below the tabs, a progress bar shows 'WHMIS 2015 In Progress - 0%'. The bottom section contains introductory text about the course: 'This online training course, The Workplace Hazardous Materials Information System (WHMIS), which is Canada's national hazard communication standard, including WHMIS requirements and regulations, hazard communications systems and hazard classes will be described and applied in the workforce. WHMIS 2015 is implemented through federal, provincial and territorial laws and it has replaced WHMIS 1988. The purpose of WHMIS regulations is to ensure employers and workers receive consistent and comprehensive health and safety information about the hazardous products they may be exposed to at work. The main elements of the program are product classification, labels, safety data sheets (SDS) and worker education. The key elements of WHMIS are hazard classification, cautionary labeling of containers, safety data sheets (SDS) and worker education and training programs. This online training course teaches the learner all components of the program and how to effectively work with them.' A red arrow points to a full-screen icon in the bottom right corner of the main content area.

5 How to view the course details

To view the full course details while the course is playing, click on the arrow icon on the right-hand side at the bottom of the page.

When clicked this area will expand to show the details for the course. When clicked a second time it will collapse to minimize this area.

Overview Lesson Details

WHMIS 2015
In Progress - 0%

This online training course, The Workplace Hazardous Materials Information System (WHMIS), which is Canada's national hazard communication standard, including WHMIS requirements and regulations, hazard communications systems and hazard classes will be described and applied in the workforce.

WHMIS 2015 is implemented through federal, provincial and territorial laws and it has replaced WHMIS 1988. The purpose of WHMIS regulations is to ensure employers and workers receive consistent and comprehensive health and safety information about the hazardous products they may be exposed to at work. The main elements of the program are product classification, labels, safety data sheets (SDSs) and worker education.

The key elements of WHMIS are hazard classification, cautionary labeling of containers, safety data sheets (SDSs) and worker education and training programs. This online training course teaches the learner all components of the program and how to effectively apply it at work.

WHMIS 2015 is aligned with the new worldwide standard, the Global Harmonization System of Classification and Labelling of Chemicals (or GHS), and this online course also describes this system's rules and formats for managing hazardous products.

The systems described in this training course are required federally and enforced in each province or territory by jurisdictional labour ministries.

Course Learning Objectives
By taking this online training course, learners will be able to:

- Define the responsibilities of the suppliers, employers and employees under WHMIS.
- Recognize the WHMIS pictograms and the danger associated.
- List the information required on the supplier and workplace labels and Safety Data Sheets.
- Outline the procedures for dealing with safe use, storage, transfer and spills of hazardous products.

Course Outline
This online WHMIS course is made up of the following sections:

1. Introduction
2. WHMIS Pictograms
3. Supplier and Workplace Labels
4. Safety Data Sheets
5. Safe Use, Storage and Transfer
6. Spill and Leak Procedures

Course Audience
This online WHMIS 2015 online training course can be taken on computers, laptops, tablets and mobile devices and was designed for all employees in Canada who work with or could be exposed to hazardous chemicals in the workplace. If you have any concerns as to whether this course is appropriate for you or your industry, please browse our full selection of online courses.
